New IPL Technology

IPL Hair Removal is a permanent and less painful solution to waxing - it is a fast and gentle way to remove unwanted hair with permanent results.

Our experienced therapists use medical grade Alma IPL Laser Technology.

This is the latest technology in IPL laser treatments from Alma Lasers. Alma has perfected the revolutionary SHR (Super Hair Removal) technology. SHR in motion technology uses a rapid series of pulses each second for continuous and complete coverage.

SHR works by gradually heating the dermis to a temperature that effectively damages the hair follicles and prevents re-growth, while avoiding injury to the surrounding tissue.

SHR offers a permanent hair removal/reduction system that is in fact, comfortable, reliable and highly effective on all skin types whilst offering a level of safety that is unprecedented.

With all IPL treatments it is imperative the correct procedures are followed and met. Pre-treatment we evaluate the client through documentation and test patching.

SHR in motion
technology

IPL Hair Removal

Alma Lasers Harmony Lite

Control, Power, Precision and Safer Treatment

Once again Lumenis has taken IPL™ to the next level with the development of Optimum Pulse Technology (OPT™), which is the consistent delivery of light energy throughout the duration of each pulse. This enables the Lumenis One the ability to give patients more measurable and precise results as well as being able to perform consistent, repeatable and safer treatments with noticeably better results.

Gentler, Quicker, Increased Comfort and More Effective

By optimising the pulse energy of every shot, it was found that the Lumenis One was able to maintain the same level of effectiveness while using lower levels of energy. What this means to patients is a gentler, more comfortable and patient-friendly procedure. Also, due to its greater overall efficiency, it allow treatments to be up to 60% faster without any compromise in the quality of the treatment.

IPL Skin Rejuvenation

Erase years of sun damage with a single treatment

Erase the effects of sun exposure and skin blemishes with IPL laser technology. Alma Harmony Lite removes pigmentation and damage caused by the sun and is also the perfect treatment for fading or removing freckles. The IPL emits a specific wavelength that is absorbed by the pigment, permanently removing it.

Dermal Fillers & Anti Wrinkle Injections

At Natural Looks Cosmetic Medicine we specialise in individual treatment plans following a consultation with you to determine your needs.

Wrinkles or expression lines appear when we smile, frown, or squint. These are exacerbated by sun damage, smoking, over use, and loss of volume with age.

Wrinkle relaxing injections are a safe and effective method of reducing or eliminating these lines. They are particularly efficient in reducing frown lines, forehead lines and crow's feet. They also reduce lines around the mouth and chin as well as for facial slimming and jaw line reduction.

A protein is injected into the muscle to relax it by temporarily blocking the nerve impulses that cause the muscle to contract. The effect takes place within 3 to 7 days of treatment and can last up to 6 months.

Dermal fillers are used to restore contour and volume and reduce lines in the face for younger revitalised and fresher appearance. At Natural Looks our dermal fillers are made from hyaluronic acid which is a naturally occurring substance in our body. The results are instant and a single treatment can last up to 2 years.

Microdermabrasion

Anti-ageing and anti-congestion with deep exfoliation soften wrinkles and refine skin texture includes LED.

EFFICIENCY

Patented “Turbo-Flow” micro-dermabrasion: a cyclone spray for perfectly even, high-safety abrasion. Micro-Dermabrasion optimised by a specific new Thalgo salon treatment protocol. Micro-Dermabrasion combined with future-proof technology: “satellites” making it possible to enrich the functions of the machine.

SAFETY

ISO 9001 medical certification:

Certification for the machine and the corundum.

The closed circuit system removes the risks of cross contamination.

The bottle of corundum in the form of a disposable cartridge, which is sealed until the moment of use: sterile, no contact with the air, reduces humidity, prevents blockages, no waste.

Optimal quality, pharmaceutical grade corundum, that is even in size and 99.9% pure (free from dust)

VERSATILITY

A multi-technology and future-proof concept: Right now: a high-performance Micro-Dermabrasion system + the “skin light” satellite using photo-energy with lightening antiseptic and soothing effects.

Treatment	Single Treatment	Prepay 6 or more
Microdermabrasion/LED/Hydration 80min	273	204
Microdermabrasion/LED/Hydration 40min	199	149

Cosmedical Grade Peels

Using Aspect Dr , M-Ceutic and Pelactiv Peels deep exfoliation strips back dead skin to reveal a more youthful you, while addressing skin concerns. These treatments improve tone & texture of your skin by smoothing out the signs of ageing and sun exposure.

- Aspect Dr Vitamin A Peel - Anabolic Resurfacing treatment to address fine lines, wrinkles, visible pores, minor discolouration and muddy complexions.
- PCA Oxygenation Trio - Skins best defence against environmental stress and oxidative damage. Help prevent the process of ageing, improving circulation, rejuvenating sluggish and stressed skin.
- M-Ceutic Peel - A key step in skin renovation and regeneration combines 3 highly concentrated (between 8% and 22.5%) dermatological active ingredients. Prescribed with therapeutic ph levels (between 2.8 and 2.4) they compose 3 strengths of peels suitable for the grades of severity.
- Pelactiv Peels - Lactic Acid Peels - A powerful effective and all natural facial peel that diminishes fine lines, balanced skin tone and leaves you with a fresh & rejuvenated complexion.

Radio Frequency And Ultra Sound

Ever wished for a more youthful appearance without diet exercise or surgery? Now you can have your dream. A unique multi-application, Radio Frequency based platform for non-invasive treatment of wrinkles cellulite and skin tightening.

The Accent XL procedure is a technique which rejuvenates aging skin in a non-invasive, radio frequency based procedure by treating two separate layers of skin in a single treatment. The technique is called “dual-layer thermotherapy”, and is effective in treating loose, sagging skin, and uneven skin texture and tone. Accent XL is also a very effective technique for the treatment of cellulite.

Dermafrac - Skin Needling

Break Through in Cosmetology Treatments

Real Treatments - Delivering Real Results

The alternative to laser skin resurfacing, without the downtime. The precise engineering of the hand piece in comparison to other hand pieces on the market prevents any bleeding or pain and instantly provides a pleasant client experience with no down time. Dermafrac is an excellent alternative to fractional laser treatments that can be expensive and more complicated.

Treatment consisted of Crystal-Free Microdermabrasion DermaFrac Micro-Channeling with Anti-Ageing Peptide Infusion and Red LED Therapy. Optimal absorption of the serum will stimulate a positive natural response by the body which will increase collagen and fibroblast activity.

Anti-aging - A 'super cocktail' of peptides that has a potential to stimulate collagen and fibroblast production and relax the muscles in a subtle, natural way.

Lightening - Kojic Acid is a natural and effective lightening agent shown to even out pigment.

Hydration - Hyaluronic Acid triggers intense hydration. A patented formulation using Hyla-Sponge technology which may result in sustained hydration of the skin. Improve conditions such as:

■ Scars ■ Stretch marks ■ Skin dehydration ■ Superficial fine lines & wrinkles ■ Pigmentation, sun spots & uneven skin tone
