

# Le Beau Day Spa

## Skinlight Client Consent Form

Purelight treatment is a new approach to maximise facial treatments, by ways that are non-invasive, respecting the physiology of the skin. Unlike Intense Pulsed Light (IPL) and lasers that rely on thermal injury to prompt the skin to repair itself, Skinlight, Light Emitting Diodes (LED) do not produce any heat, they only stimulate naturally occurring regeneration and repair processes of the skin. Skinlight treatments combines the technology of light with microdermabrasion. The latter helps improve skin texture, a necessary part of a complete acne prone skin treatment.

Skinlight treatments will reduce the problems caused by active sebaceous gland and is an excellent way to increase collagen production in the skin, keeping it smoother and healthier looking longer. These results will occur gradually during the treatment series, an average of 9 treatments. The number may vary depending upon the severity of the problem. \_\_\_\_\_

Due to the nature of the LED light, photosensitizing medications as well as illnesses that cause photosensitivity are considered contradictions to the treatment. Advise the technician of any medications that you may be taking and of your medical history. \_\_\_\_\_

The light or currents used during Skinlight treatments cannot cause any allergic reaction, some skins may experience momentary redness following a treatment. \_\_\_\_\_

Individuals prone to dizziness may experience some discomfort, these reactions are temporary and with no consequence. \_\_\_\_\_

The result of any treatment depends upon the individual skin metabolism of each person. It is important to understand that the speed at which results are achieved as well as the final outcome can never be exactly predicted. The number of treatment sessions that will be needed will be estimated approximately and may change during the course of the treatment series. \_\_\_\_\_

It is important that you attend your scheduled appointments regularly in order to obtain the best possible results. \_\_\_\_\_

There is no guarantee that the achieved results will match the results that are desired. \_\_\_\_\_

Some skin conditions are due to underlying problems, which, if not resolved, may cause the condition to reappear once the treatment series is completed. It is therefore strongly recommended to follow maintenance program in order to maintain results. \_\_\_\_\_

I have read the above explanations and recommendations regarding Skinlight treatments. I understand the advantages and the limitations of the treatment. I agree to follow the recommendations given to me by my therapist or aesthetician in order to achieve the best possible results. I understand that there are no guaranteed results and that maintenance is necessary.
